Datos Health is growing and looking to add a Junior React Developer to our team!

About Datos Health:

Datos Health offers a fully automated remote care platform designed to directly connect patients with medical sources of care from the comfort of their own homes, for improved quality of life. The platform makes it possible to safely monitor, detect, analyze and predict adverse events or other changes in patient conditions – enabling care teams to communicate and intervene in real-time and to successfully manage even the most complex medical treatment protocols.

Our full-stack remote patient monitoring solution is both device-agnostic and disease-agnostic and seamlessly equips care teams with the data and tools required to manage even their most complex and chronically ill patients.

Role Description:

- Take a major part in creation of our React application that replaces our old AngularJS application.
- Work closely with Product, Team Lead, QA and other teammates.
- Take part in developing our infrastructure and architecture
- Design, Develop and integrate quality code for our Core Product team

Requirements:

- 1+ years' experience with basic web technologies such as HTML5, CSS3 and JavaScript
- 1+ years' experience with React and TypeScript
- Familiarity with RESTful APIs
- A quick, independent learner, who is always looking to improve existing code
- Ability to self-learn modern technologies

Preferred Qualifications:

- Familiarity with AngularJS
- Experience with common front-end development tools such as Babel, Webpack, NPM, etc.
